

Ten Quotes. 100 kilobytes.

Weeks 10 and 11. 11/30 or 12/4 and 12/7 or 11

Project 2. The quotes project.

Find 10 quotes that are thematically similar. You will need to style the quote and the attribution, similar to [100 days of fonts](#). If all your quotes are from the same person, then use the date or something similar for the attribution.

Rules:

- It has to be responsive. Hint, start with mobile-first.
- There should be some sort of introductory section/headline/paragraph.
- It must display an expert knowledge of typography, by way of CSS
- There is a maximum file size of 100k. A typical HTML document is 3-4k, a CSS file adds another 3-4k. This means you have about 92k for images or about 9k per image. Your code needs to validate.
- It must lend itself to incredible storytelling during your final presentation. Whether you choose, funny, inspirational, sarcastic, or somber...design for emotion.

Workflow:

Option 1 (the smart way). Do one quote a week over the course of the quarter. Re-learn your HTML/CSS slowly. Polish and refine in the final two weeks.

Option 2 (most of you). Wait until the end of the quarter, realize HTML/CSS is hard. Panic.
