

Project #4 - Single Line Icons

PROJECT DESCRIPTION:

The goal of this project is to capture meaning and the essence of an item in an icon form

PROJECT OBJECTIVES:

Create 4 icons from **ONE** of the following lists:

1. Items found in a fridge
2. Items found in a bathroom
3. Items found your junk drawer

These icons will be 2D, and will capture the essence and the details of the items chosen and convey the essence of the items. This is not illustration or graphic expression, this is a simplified, cohesive, linear composition of these object. Research icons as to why they are icons and what visually distinguishes icons from illustration and graphic translation.

THE RULES:

These are to be created from a single (**yes one and ONLY one line**), non-broken, continuous line that creates the entire icon and all of its detail. This line cannot over or under lap itself and must be unbroken in the entire creation of this icon.

You cannot use the Width Shape Tool.

You can use ONE other shape in each of these icons but you can ONLY use that shape ONCE. That shape does NOT need to be the same in each icon but it can be if you choose. This additional shape can only account for 10% of the icon.

You cannot use any letters, numbers, symbols or words in creating these icons.

Black and white only. No other tints can be used. No other colors are to be used.

DIMENSIONS:

Final size of each icon is to be 2.5" x 2.5"

DELIVERABLES:

Digital copy of your final sketch.

Digital copy of your final file in Adobe Illustrator
