

Box Dieline Exercise: Due Week 7 @ 2:00 PM

Assignment:

Build a dieline in Illustrator for an existing box that you find in your home.

What you're learning:

- Dieline creation
- Box construction
- Illustrator practice

Process:

1. Find a box in your home that you can deconstruct. Any folded box type will do, does not have to be corrugate.
2. Take a photo of the box before you deconstruct it
3. Deconstruct the box carefully until you have a layflat. Take another photo, as close to top-down as you can get of the print side.
4. Create a dieline for that box in illustrator, with dimensions. Adhere to the file structure in the example .ai file given.
5. Submit files to the Dropbox folder by 2:00 PM:
 - a. One **.ai** file that contains your dieline.
 - b. One **.jpg** that contains both photos (before and after deconstruction)

Place your files into the folder below by 2:00 PM:
