OPC: Other people's code

1. Copy the html into your html
2. Copy the css into your css `/*comment*/`
(lookout for duplicate css rules)
3. Copy their javaScript into your file or folder
Could be an external .js file, in the `<head>` of your doc, or just before the closing `</body>` tag.
4. Check for external links like a CDN
5. Check your path/to/file especially for images
Replace with your images
