

ORIGINAL FLAT PLAN — END MATTER PAGE POSITION

Positions of the end matter pages: As with prelims or front matter, the sequence of sections at the end of the book can vary depending on content and function. Every effort should be made to leave two blanks at the end of a book. This is especially true if the book is to be hard bound as the back endpaper has to be partially fixed onto the last page.

The following pages may be included in the back matter:

Appendices

Endnotes

Abbreviations

Photographers'/Illustrators' credits

Glossary

Bibliography

Acknowledgements

Indexes

Colophon

A conventional sequence for endmatter.
